**Wells Engineered Products is Charging Up for the
Electric & Hybrid Vehicle Technology Expo 2021**

*Explore Our Innovative Rotary Positioning Sensing
Technology by Visiting Booth #1318*

FOND DU LAC, WI (August 11, 2021) – Wells Engineered Products, a business unit of Wells Vehicle Electronics, is preparing to exhibit at the [Electric & Hybrid Vehicle Technology Expo](#), which takes place September 14-16, 2021, at the Suburban Collection Showplace in Novi, MI.

“After more than a year without attending in-person events, we’re excited to be attending the Electric & Hybrid Vehicle Technology Expo,” said Greg Burneske, Vice President of Wells Engineered Products. “We especially look forward to leading the conversation on [rotary position sensing](#) for EV powertrain applications and engaging with some of the best and brightest in electric and hybrid vehicle technology during the show.”

Visit Wells Engineered Products during the EHVT Expo in Booth #1318 for live demonstrations of rotary position sensing technology, the opportunity to engage with key members of the Wells Engineered Products engineering team, and begin to explore how to incorporate this proprietary technology in your EV motor program.

As a full-line manufacturer of precision engine management, sensor and control products for manufacturers of premium vehicles and equipment throughout North America, Wells Engineered Products leverages Wells’ history of innovation, unmatched engineering resources and commitment to customer service to solve a wide variety of engineering challenges.
